

## Our Mission

Heart to Heart International strengthens communities through improving health access, providing humanitarian development and administering crisis relief worldwide. We engage volunteers, collaborate with partners and deploy resources to achieve this mission.

*Every Day We Help, Every Day We Give Hope.*

## Programs

### • Disaster Response

We are prepared and ready to respond to natural disasters and humanitarian crisis at a moment's notice. Twenty-five years of experience providing medical assistance, medicines, medical supplies, equipment and hygiene kits in the U.S. and around the globe.

### • Cameroon

We provide a leadership role in organizing and managing volunteer service trips while partnering with BD to improve hospital and community access to health care in Fotabong, Cameroon.

### • U.S. Rural Health

We established Health in the Heartland, an initiative to promote health and improve health access in rural communities. HHI provides expertise on improving health access to rural areas that are losing medical professionals, hospitals and clinics.

### • Africa

We are working with African Society for Laboratory Medicine (ASLM) and Center for Disease Control (CDC) to create a fellowship program to address immediate population-based assessments in twenty countries.

### • Keeping Girls in School

We work with global community partners to supply female hygiene kits and educate communities to keep girls in school as they develop into young women.

### • PowrServ

PowrServ offers unique philanthropic team-building events that engage participants in the hands-on assembling of different types of hygiene kits to meet the needs of people impacted by crisis or disaster.

### • Haiti

Since 2010, HHI has educated and trained Haitian leaders to improve medical access, hygiene and overall health. In 2018 we opened a women's clinic in the largest vendor market in Pétion-ville, providing medical care to thousands of women with no other option.

### • U.S. Clinics and Labs

We support clinics that work with low-income patients. Through partners, HHI supplies laboratory equipment to diagnose, counsel and treat a patient in a single visit, saving time and money for both the clinic and patient.
